

News Release:

**Adelaide, South Australia (4 March, 2010)** – Adelaide-based wall technology developer Ace-Wall International Pty Ltd today announced that it has signed a cooperation agreement with the Weeks Group to prepare the ground for the adoption of the new eco-friendly Ace-Wall™ gypsum wall panel in Weeks' (Supaloc) steel building systems and construction projects in Australia and overseas.

The agreement paves the way for the introduction of Ace-Wall™ as an external wall cladding for residential housing and for internal partition and party walls for commercial and residential high rise.

“To be working with an industry leader such as Weeks Group, and its founder and MD Kevin Weeks, is a very exciting step for us at Ace-Wall” said Bill Wallace, MD of Ace-Wall International, “We believe our product will revolutionize the walling industry and we are proud to be able to offer this product to such a proven pioneer in the construction industry”.

The Ace-Wall™ product is produced using a revolutionary moulding process and provides the industry with a high performance, low embodied energy solution for non-load bearing applications. Ace-Wall International is preparing to commence the manufacture and supply of Ace-Wall™ in Australia later this year.
